

# FLEXI®-Drain

**KBI Flexi®-Drain** provides a low-impact, porous alternative to treat a variety of drainage challenges. Installations can solve standing water problems, address water entry issues, and prevent damage from stormwater runoff. This tactile, high-grip, product uses three parts: wire-free recycled tire granules; rock aggregate; and KBI's proprietary binding agent. Whether you need 100% drainage, 100% conveyance, or something in between, KBI Flexi®-Drain is fully customizable to your drainage needs.

## ● KBI Flexi®-Drain benefits

- **Porous** – quickly drains standing water & eliminates sheet flow problems
- **Low-Impact** – fast installation with minimal digging, trenching & disruption
- **Customizable** – can be engineered to your specific drainage needs

## ● KBI Flexi®-Drain value

- Minimizes stormwater runoff
- Controls erosion protecting ecologically sensitive areas
- Flexes in freeze-thaw cycles and summer heat reducing maintenance costs
- Reduces liability and maintenance expenses
